Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
 Project: ABOVE GRID BINGHAMTON SOLAR
 Date: MAY 9, 2022

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

During the Lead Agency's assessment the following potential impacts were identified and explored:

- Action may involve construction on, or physical alteration of the land surface of the proposed site - Erosion impacts due to physical disturbance or vegetation removal during construction or increase in impervious ground cover (total 0.40 acres impervious surfaces). A Stormwater Pollution Prevention Plan (SWPPP) will be developed and a permit will be issued by the NYSDEC prior to construction.

- Action may affect one or more wetlands or other surface water bodies - Review of the National Wetlands Inventory showed two potential wetland areas including the Little Choconut Creek tributary. The applicant is waiting for an updated wetlands delineation report to determine what, if any, impacts to wetlands will occur. The applicant will consult with the US Army Corps of Engineers and obtain any required approvals/permits prior to construction.

- The proposed action may result in the loss of flora or fauna

- The Monarch Butterfly was identified as a candidate species within the area by the US Fish and Wildlife Service. As a candidate species, there are no legal regulations for the monarch butterfly under the Endangered Species Act.
- The action requires conversion of more than 10 acres of forest (22.04 total acres as indicated on Part 1 of the EAF). The project site is adjacent to the airport development and there are other areas with similar conditions located on the project parcel. The project site is zoned industrial which is consistent with this use. Therefore, impacts to local species due to habitat fragmentation are not expected.

- The proposed action may occur wholly or partially within, or substantially contiguous to, an archaeological site not included on the NY SHPO inventory.- The applicant completed a Phase 1A Cultural Resources Assessment which determined the entire project site has high archaeological sensitivity and a Phase 1B assessment was recommended. The applicant will complete the assessment prior to construction in accordance with the standards of the New York Archaeological Council, adopted by the NYS SHPO and any cultural resources uncovered will be managed in a manner that meets NYAC standards.

Considering this assessment we have determined that there will be no significant adverse impacts on the environment resulting from the proposed project.

Determination of Significance - Type 1 and Unlisted Actions.

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information
BC GIS Parcel Details, Preliminary Site Plan, Site Layout, NCRS Water Table Info, Phase 1A Assessment, SHPO recommendation for Phase 1B

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
BROOME COUNTY LEGISLATURE as lead agency that:

- A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.
- B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:
