Part 3 Determination of Significance

For every question in Part 2 that was answered “moderate to large impact may occur”, or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

Impact on Land

Will the proposed action result in a change in the use or intensity of use of land?

The communications facilities will have a small to moderate impact on land. The total project area per site involves the disturbance of less than one acre of land, primarily only \pm 0.25-0.50 acres. Where a new site access road is needed, then a gravel and crushed stone road will be built for site access. A right-of-way easement will be 30 \pm ft. wide for the access road and utility easements where applicable. Utilities will be installed underground within a trench running along access roads or the shortest route to nearest existing service point.

Impact on Historical and Archaeological Resources

Will the proposed action impair the character or quality of important historic, archaeological, architectural or aesthetic resources?

A cultural resources specialist will be retained to review the proposed action consistent with Section 106 of the National Historic Preservation Act of 1966 to identify whether or not the proposed action has the potential to impact any properties in, or eligible for inclusion in, the National Register of Historic Places; as well as to determine if any significant scientific, prehistoric, historic, archaeological, or paleontological resources would be lost or diminished as a result of the proposed project. The project will be reviewed by the State Historic Preservation Office (SHPO); the project will adhere to SHPO recommendations to avoid potential conflicts with significant resources.
